**Heavy Duty**

**SELF-DUMPING HOPPERS**

“Star Attachments Turn a Forklift into a Whole Fleet of Equipment”

**Heavy Duty - “Construction Grade”**

Star Heavy Duty Self-Dumping Hoppers are constructed of 1/4” and 3/16” steel plate to withstand the use and abuse of a fast moving construction job. These are not the thin sheet metal hoppers you find in many industrial plants but rugged long lasting hoppers designed for the construction industry. Ideal for removing broken-up concrete, plaster, brick and other construction refuse.

**Safety First** ... these features are **standard** on all Star Self-Dumping Hoppers.

- **Hopper Safety Lock** - a separate lock prevents the hopper from inadvertently dumping when traveling over rough terrain.

- **Rope Release** - permits releasing the latch from the ground or from the operator’s seat. Forklift operator can discharge the hopper safely even when it is elevated.

- **Safety Chain and Grab Hook** - secures the hopper to the forklift. Ensures the hopper will not slide off the forks when traveling or dumping.

**STAR HOPPERS AVAILABLE IN FIVE POPULAR SIZES:**

- ½ cubic yard Narrow
- 1 cubic yard
- 1½ cubic yard
- 2 cubic yard
- 2½ cubic yard

other sizes available

**Universal Fit** - Can be used with both straight-mast and extendable-reach forklifts. Pocket Base accommodates forks up to 10” wide and 2 ½” thick.
In accordance with a policy of constant improvement, Star Industries reserves the right to change specifications without notice.

HOPPERS ARE PRIMED AND THEN COATED WITH BLACK ENAMEL.

### Options

**Heavy-Duty Casters**  
Model 1800-05

Star Self-Dumping Hoppers are available with Heavy-Duty Steel Casters and 8” diameter Polyurethane Wheels with Roller Bearings. The combination of the larger wheel size, roller bearings, and the polyurethane tire material makes it easier to push the hopper over trash and foreign objects. Rear wheels swivel for easy maneuverability. Casters are bolted to hopper (not welded) so they can be easily replaced if damaged.

**Lifting Hooks**  
Model 1800-LH

Optional Lifting Hooks (eyes) are available for handling hoppers with a crane. A hook is welded to each corner of the hopper. Shackles should be used to attach slings to hooks. Heavy duty hooks are designed to handle the weight of empty hopper plus it's full rated load capacity.  
**Please Note:** Hopper can not be discharged while suspended with a crane.
